

DRINKING WATER ISSUE RESOLVED

Customers of the City of Houston Main Public Drinking Water System were notified on June 5, 2015 of the presence of coliform bacteria in more than five percent of samples collected during the month of May. **The issue has been resolved and our public water system has returned to compliance.** Please contact 3-1-1 by calling 311 or 713-837-0311, by emailing 311@houstontx.gov, or through www.houston311.org with any comments or questions.

Please share this information with all the other people who drink our water, especially those who may not have seen this notice. You may help in distributing it by posting this notice in a public place (for example, apartments, nursing homes, schools, and businesses).
