

## Temporary Suspension of the Multi-Discipline Inspection (MDI) Program

**EFFECTIVE IMMEDIATELY**

### Attention MDI Program Builders and Participants:

Due to the increased volume of inspections and our commitment to providing the highest quality of service with those inspections, our MDI inspection program has reached capacity. To ensure continued quality, the MDI program will temporarily be suspended for new applications.

We understand the importance of the program and its value to our customers. Consequently, we are working on solutions to augment staff levels for this program with the goal of reinstating this permitting option as soon as possible. We will honor all currently approved MDI permits. We will not take in any additional building permit applications under this program until further notice.

As a result, all permits will be set up under the standard building permit process, requiring each trade to pull separate permits under the 11- Electrical, 12-Plumbing, 13-Building, and 14-HVAC series of permits. In addition, all inspections will need to be scheduled by the permit holder under these permit types and will be inspected by a zone inspector for the trade.

For additional information regarding this temporary change, please contact Judy Walton at 832-394-9334
