The purpose of an MSD is to create a means by which the TCEQ may limit the scope of investigations and response actions for groundwater contamination at a site, if the groundwater is prohibited from use as a source of potable water. Any person owning, operating or controlling the designated property remains responsible for complying with all applicable federal and state laws and regulations and all ordinances, rules and regulations of the city. If the City Council approves the application, it will enact an ordinance prohibiting the use of designated groundwater beneath the site for potable purposes and supporting the application to the TCEQ. “Potable water” means water used for irrigation, production of food or drink products intended for human consumption, drinking, showering, bathing, or cooking purposes.

Any person wishing to speak on this issue must contact the City Secretary’s office at (832) 393-1100 to reserve time not later than 8:30 am on August 20, 2008.
