

**Former Rheem
Manufacturing Facility
1025 Lockwood Dr.
Houston, Texas**

**Municipal Setting
Designation (MSD)
Application**

March 27, 2009

Municipal Setting Designation Application Instructions

Application Form: The application form is self-explanatory. Submit this completed application form as an electronic portable digital file, including all supporting documentation (#'s 1-26, if applicable) along with one (1) additional copy of the application and all supporting documentation (#'s 1-26), to the City of Houston, Public Works and Engineering Department, Planning and Development Division, Planning Branch (address shown at the bottom of this page) when applying for a Municipal Setting Designation (MSD) Certificate. The MSD application process is governed by the City of Houston Ordinance Number 2007-959. Failure to use this application form will result in denial of the application.

This application must be clear, complete, concise, correct, contain only relevant information and be organized to facilitate analysis. Supporting documentation should be submitted as a separate appendix to the application, as noted (Label "Appendix_") for each numbered item. You should also indicate by checking "Yes", "No", or "N/A" in response to the stated question.

Maps: All maps must be accurate and drawn to-scale. The supporting information can be consolidated on fewer maps than are listed, provided the information is legible.

A professional surveyor registered with the Texas Board of Professional Surveying must certify that all property descriptions or maps with metes and bounds descriptions are accurate.

Submittal: Submit the application form and all supporting information, along with an application fee of \$2,000.00 (payable to City of Houston) to:

City of Houston
Public Works and Engineering Department
Planning and Development Division/Planning Branch
611 Walker, 18th Floor
Houston, Texas 77002

Important Note: The applicant must also pay the estimated cost of mailing notices, advertising for the public meeting, venue costs and filing fee. No refunds of these fees will be made. If there are any questions, please contact the Planning Branch at 713-837-0928.

ITEM	YES	NO	N/A	COH Use Only
**Executive Summary (Use Sheet Attached)	X			
1. Provide a legal description of the boundaries of the designated property and a copy of the deed for the designated property. <u>Label "Appendix A" - Cross Reference with TCEQ's # 3</u>	X			
2. A site map showing: a. The location of the designated property. b. The topography of the designated property as indicated on publicly available sources, which must note the watershed and whether the designated property is located in a floodplain or floodway, as those terms are defined in Chapter 19 of the Code. c. The detected area of groundwater contamination. d. The location of all soil sampling locations and all groundwater monitoring wells. e. Groundwater gradients, to the extent known, and direction of groundwater flow. f. The ingestion protective concentration level exceedence zone for each contaminant of concern, to the extent known. <u>Label "Appendix B" - Cross Reference with TCEQ's # 1, 2 & 4</u>	X			
3. A description of the current use, and, to the extent known, the anticipated uses, of the designated property and properties within 500 feet of the boundary of the designated property. <u>Label "Appendix C"</u>	X			
4. For each contaminant of concern within the ingestion protective concentration level exceedence zone, to the extent known, provide the following: a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface. b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units. c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water). <u>Label "Appendix D" - Cross Reference with TCEQ's # 5</u>	X			
5. For each contaminant of concern within the designated groundwater, to the extent known: a. A description of the ingestion protective concentration level exceedence zone and the non-ingestion protective concentration level exceedence zone, including a specification of the horizontal area and the minimum and maximum depth below ground surface. b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units. c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water). <u>Label "Appendix E" - Cross Reference with TCEQ's # 5</u>	X			

ITEM	YES	NO	N/A	COH Use Only
<p>6. A table displaying the following information for each contaminant of concern, to the extent known:</p> <ul style="list-style-type: none"> a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units. b. The critical protective concentration level without the municipal setting designation, highlighting any exceedences. <p><u>Label "Appendix F" - Cross Reference with TCEQ's # 5</u></p>	x			
<p>7. A statement as to whether the plume of contamination is stable, expanding, or contracting, with the basis for that statement. If this information is not known, a statement of why the information is not known should be attached.</p> <p><u>Label "Appendix G"</u></p>	x			
<p>8. A statement as to whether contamination on and off the designated property without a municipal setting designation <u>exceeds</u> a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.</p> <p><u>Label "Appendix H"</u></p>	x			
<p>9. A statement as to whether contamination on and off the designated property with a municipal setting designation <u>will exceed</u> a residential assessment level as defined in the Texas Risk Reduction Program or analogous residential level set by EPA, if known, and the basis for that statement.</p> <p><u>Label "Appendix I"</u></p>	x			
<p>10. Identification of the points of origin of the contamination and the persons responsible for the contamination, to the extent known.</p> <p><u>Label "Appendix J"</u></p>	x			
<p>11. A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known.</p> <p><u>Label "Appendix K"</u></p>			x	
<p>12. A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property.</p> <p><u>Label "Appendix L"</u></p>	x			
<p>13. A statement as to whether the designated property has been admitted to the Texas Voluntary Cleanup Program (section 361.601 of the Texas Health & Safety Code, as may be amended from time to time) or similar state or federal programs, and a description of the status of the designated property in the program.</p> <p><u>Label "Appendix M"</u></p>	x			
<p>14. A summary of any environmental site assessment reports filed with TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property.</p> <p><u>Label "Appendix N"</u></p>	x			

ITEM	YES	NO	N/A	COH Use Only
<p>15. A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and property within one-half mile of the designated property and the identity of each supply system. <u>Label "Appendix O" - Cross Reference with TCEQ's # 2, 1st bullet</u></p>	x			
<p>16. The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with: a. A map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water. b. A statement as to whether the applicant has provided notice to each owner in compliance with section 361.805 of the Texas Health and Safety Code. <u>Label "Appendix P" - Cross Reference with TCEQ's # 8 & 9</u></p>	x			
<p>17. The name and address of each retail public utility, as defined in section 13.002 of the Texas Water Code, that owns or operates a groundwater supply well within five miles of the boundary of the designated property, along with a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code. <u>Label "Appendix Q" - Cross Reference with TCEQ's # 7, 3rd bullet</u></p>	x			
<p>18. A listing of each municipality, other than the city of Houston, with a corporate limit within one-half mile of the boundary of the designated property, and a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code. <u>Label "Appendix R" - Cross Reference with TCEQ's # 7, 2nd bullet</u></p>			x	
<p>19. A listing of each municipality, other than the city of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property, and a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code. <u>Label "Appendix S" - Cross Reference with TCEQ's # 7, 4th bullet</u></p>	x			
<p>20. A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. (Include pre-printed mailing labels) <u>Label "Appendix T"</u></p>	x			

ITEM	YES	NO	N/A	COH Use Only
<p>21. The following statement signed and sealed by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation: 'To the best of my knowledge and belief, based upon a review of all public and private records and other information sources available to me in the exercise of due diligence, the opinions stated and conclusions made in this application are supported by such information, and the technical and scientific information submitted with the application is true, accurate and complete. Based on such review, the contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not do exceed or do not exceed a non-ingestion protective concentration level on property beyond the boundaries of the designated property'</p> <p style="text-align: center;"><u>Label "Appendix U"</u></p>	x			
<p>22. If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must:</p> <ol style="list-style-type: none"> a. Specify the name and address of the owner of each property. b. Send a copy of the application to the owner of the property with the notice of the public meeting. c. Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time). d. Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedances have been addressed to the satisfaction of the agency administering the program. <p style="text-align: center;"><u>Label "Appendix V"</u></p>	x			
<p>23. The following statement certified by the applicant and any authorized representatives of the applicant(s) listed in the application: 'I certify under penalty of law that this application and all attachments were prepared under my direction or supervision in a manner designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the persons responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violation'.</p> <p style="text-align: center;"><u>Label "Appendix W"</u></p>	x			
<p>24. A copy of the TCEQ application, if it has been filed, excluding attachments. <u>Label "Appendix X"</u></p>	x			

25. The signature of the applicant and proof that the applicant has the legal authority to restrict the use of the groundwater on the designated property. <u>Label "Appendix Y"</u>	x			
26. The initial filing fee of \$2,000.00 payable to "City of Houston". <u>Label "Appendix Z"</u>	x			
27. Any additional information. <u>Label "Appendix AA"</u>			x	

EXECUTIVE SUMMARY

Project Overview

ARCADIS U.S., Inc. (ARCADIS) was retained by Rheem Manufacturing Company (Rheem) to conduct environmental site assessments for the property located at 1025 Lockwood Dr in Houston, Texas. This property is approximately 12.4 acres located in a mixed light industrial and commercial area just east of downtown Houston. ARCADIS, as a representative for Rheem, which is the former property owner, is submitting this application on behalf of the current owner, Annie D. Adams Family Partnership, Ltd. The groundwater at the site is affected by chlorinated volatile organic compounds (VOCs) in the upper and, to a lesser extent, second water-bearing zones. In particular, tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-Dichloroethene (cis-1,2-DCE) and vinyl chloride (VC) have been detected in concentrations that exceed the Texas Commission on Environmental Quality's (TCEQ) Texas Risk Reduction Program (TRRP) Tier 1 Residential ^{GW}GW_{Ing} Protective Concentration Levels (PCL) or the Ingestion Protective Concentration Levels (IPCL).

Site History

The property was formerly owned by Rheem and cold steel container or drum manufacturing operations were conducted from the 1930s until the property was sold in 1986. Groundwater monitoring has occurred at the site since 1990. Directly to the north of the former Rheem site is a property formerly owned by Cooper Energy Services (now Cameron International Corporation [Cameron]). For the purposes of this transmittal the property to the north of the former Rheem property is referred to as the former Cameron property. There is a groundwater plume of chlorinated VOCs associated with the former Cameron property in both the upper and second water-bearing zones. The plume associated with the former Cameron property has IPCL exceedances of the same chlorinated VOCs. It appears that the affected groundwater from the two properties has comeled near the property boundary.

An 8-foot concrete storm sewer line, located several feet below ground surface, is under the former Cameron property a short distance to the north of the boundary between the two properties. This sewer line is connected to and receives flow from a subsurface storm sewer line below Lockwood Drive to the east of the former Cameron property. Cameron has indicated in its submissions to TCEQ that the subsurface storm sewers act as a barrier to most, if not all, transport of constituents of concern, from one side of the sewer to the other (not verified by ARCADIS).

Both Rheem and Cameron have historically worked closely with regulators from the TCEQ and have submitted numerous site assessments, monitoring reports and other pertinent reports as requested by the TCEQ. In a letter from the TCEQ dated July 30, 2008, Eleanor Wehner approved Rheem's recommendation to apply for a Municipal Settings Designation for the site. Affected groundwater beneath the former Cameron property is being addressed by Cameron, as part of their remedial action plan.

EXECUTIVE SUMMARY

Cameron has committed to submitting its own closure plan to the TCEQ for the former Cameron facility. Cameron has informed Rheem that it has contractual rights to restrict groundwater use and to implement other necessary institutional controls to achieve closure at the former Cameron facility.

Current Site Status

The former Rheem property (site) is currently occupied by Houston Container and Trailer Marrying Company, a.k.a. Con Tra Mar. It is used as a warehouse for temporary storage and shipment of products. The properties immediately surrounding the site are used as mixed commercial and light industrial facilities. Residential areas exist to the west of the former Cameron property.

Historical data and data collected during the most recent sampling event (conducted in October 2008) indicate an IPCL Exceedance Zone (IPCLEZ) that extends from the central portion of the former Cameron property to the central portion of the former Rheem property. None of the groundwater samples collected to date has returned detected concentrations constituents above the non-ingestion protective concentration levels.

Based on historical constituent concentration trends it is believed that the groundwater plume in the upper water-bearing zone is shrinking in both size and concentration. It is believed that the plume in the second water-bearing zone is stable. There is no indication of any significant remaining source materials at the site that would contribute to groundwater concentrations. Based on the long-term historical trends and the absence of any on-going source, groundwater concentrations are expected to decline over time and remain far below the non-ingestion protective concentration levels.

ADAMS and wife, ANNIE D. ADAMS, of Harris County, Texas, (hereinafter called Grantees), the receipt of which is hereby acknowledged and confessed, and certain other good and valuable considerations paid to Grantor by Grantees, has GRANTED AND CONVEYED, and by these presents does GRANT AND CONVEY unto said Grantees the following described property, lying and being situated in Harris County, Texas, to-wit:

J.W.

a

R

Together with all improvements thereon, (y)

A tract of land containing 12.3663 acres and being out of the Harris and Wilson Two League Grant, Abstract Number 32, Harris County, Texas, also being out of that 35 acre tract conveyed to W. H. Sharp by deed recorded in Volume 746, Page 481 of the Deed Records for said county; said 12.3663 acres being all of that called 12.456 acres described in deed recorded in Volume 1022, Page 93 of said deed records, SAVE AND EXCEPT 3,934 square feet off the Southeast corner thereof conveyed for street purposes; said 12.3663 acres being more particularly described by metes and bounds as follows:

D

COMMENCING at a 1/2 inch iron pipe found at the apparent intersection of the Northerly right of way line of Clinton Drive with the Westerly right of way line of Lockwood Drive;

THENCE, South 01 deg. 11' 21" West, 369.36 feet to a fence corner found for the POINT OF BEGINNING of the herein described tract, same being the intersection of the North right of way line of Texas and New Orleans Railway Clinton Branch with the West right of way line of Lockwood Drive;

THENCE North 71 deg. 09' 30" West, 547.04 feet along and coincident with said Railways North right of way line to a 1/2 inch iron rod set in the West line of the aforementioned 35 acre tract;

THENCE North 00 deg. 48' 30" East, 916.58 feet along said West line to a 1/2" iron rod set for the Northwest corner of said 35 acre tract and of the herein described tract, from which a 3/4 inch iron rod bears South 24 deg. 15' East, 2.55 feet;

THENCE, South 89 deg. 11' 30" East, 540.17 feet along the North line of said 35 acre tract to a fence corner found on the West right-of-way line of Lockwood Drive, (100.00 feet wide at this point);

✓

RETURN TO: EDWARD S. CUTRER
P. O. BOX 1504
HOUSTON, TEXAS 77251-1504

THENCE, South 00 deg. 48' 30" West, 703.17 feet along and coincident with said right-of-way line to an "X" found in concrete at the beginning of a curve to the right;

THENCE, 124.64 feet along and coincident with said right-of-way line and along said curve to the right having a radius of 1587.02 feet, a central angle of 04 deg. 30' 00", and a chord which bears South 03 deg. 03' 28" West, 124.61 feet to a 1/2 inch iron rod set at the end of said curve;

THENCE, South 05 deg. 18' 28" West, 126.27 feet continuing along and coincident with said right-of-way line to an "X" found in concrete at the beginning of a curve to the left;

THENCE, 132.50 feet along and coincident with said right-of-way line and along said curve to the left, having a radius of 1687.02 feet, a central angle of 04 deg. 30' 00", and a chord which bears South 03 deg. 03' 28" West, 132.46 feet to the POINT OF BEGINNING and containing within these calls a computed area of 12.3663 acres.

Taxes for the current tax year have been prorated and will be assumed and paid by Grantees.

TO HAVE AND TO HOLD the above described property, together with all and singular the said rights and appurtenances thereto in anywise belonging, unto the said Grantees, their heirs and assigns forever; and Grantor does hereby bind itself, its successors and assigns to WARRANT AND FOREVER DEFEND, all and singular, the said premises unto said Grantees, their heirs and assigns, against every person whomsoever lawfully claiming or to claim the same or any part thereof.

Grantee acknowledges and agrees, however, that part of the consideration for said property is evidenced by one certain Promissory Note (herein called said Note), of even date herewith, in the principal sum of \$890,000.00, payable to the order of METRO BANK, N.A., as therein provided, reference being made to said Note for all relevant purposes. To secure the payment of said consideration for said property evidenced by said Note, Grantor does hereby expressly retain a Vendor's Lien and Superior Title upon and against said Property, until said consideration for said property evidenced by said Note is fully paid according to the face, tenor, effect and reading of said Note, whereupon this Deed shall become absolute.

185-61-2051

METRO BANK, N.A., at the instance and request of the Grantee herein, having advanced and paid in cash to the Grantor herein that portion of the purchase price of the herein described property as is evidenced by the hereinabove described \$890,000.00 Note, the Vendor's Lien, together with the Superior Title to said property is retained herein for the benefit of said METRO BANK, N.A. and the same are hereby TRANSFERRED AND ASSIGNED to said METRO BANK, N.A.

EXECUTED this 22nd day of May, 1990.

COUNTY CLERK
HARRIS COUNTY, TEXAS

ANY PROVISION HEREIN WHICH RESTRICTS THE SALE, RENTAL, OR USE OF THE DESCRIBED REAL PROPERTY IN VIOLATION OF FEDERAL OR STATE LAW IS INVALID AND UNENFORCEABLE UNDER FEDERAL LAW.
THE STATE OF TEXAS
COUNTY OF HARRIS

I hereby certify that this instrument was FILED in File Number Sequence on the date and at the time stamped hereon by me; and was duly RECORDED, in the Official Public Records of Real Property of Harris County, Texas on

AUG 13 1990

Quita Roddenberry
COUNTY CLERK,
HARRIS COUNTY, TEXAS

Appendix B

Figures and Site Maps

Item 2: A site map showing:**a. The location of the designated property.**

The property location is shown in **Figure B-1**.

b. The topography of the designated property as indicated on publicly available sources, which must note the watershed and whether the designated property is located in a floodplain or floodwater, as those terms are defined in Chapter 19 of the Code.

The topography of the designated property is shown in **Figure B-2**. The designated property is not located in a floodplain or floodway as shown in **Figure B-3**. The property is located in the Buffalo Bayou watershed as shown in **Figure B-4**.

c. The detected area of groundwater contamination.

Figure B-5 depicts the area of groundwater contamination for all contaminants of concern (COCs) in the upper water-bearing zone. **Figures B-13, B-14** and **B-15** show the estimated area of groundwater contamination in the second water-bearing zone.

d. The location of all the soil sampling locations and all groundwater monitoring wells.

The locations of the soil sampling location and all groundwater wells screened in either the upper or lower water-bearing zones are shown in **Figure B-6**.

e. Groundwater gradients, to the extent known, and direction of groundwater flow.

Figure B-7 shows the groundwater gradient in the upper water-bearing zone and indicates groundwater flow is generally radial into an area north of the northeast corner of the property. **Figure B-8** shows the groundwater gradient in the second water-bearing zone and indicates flow is to the west.

f. The ingestion protective concentration level exceedance zone for each contaminant of concern, to the extent known.

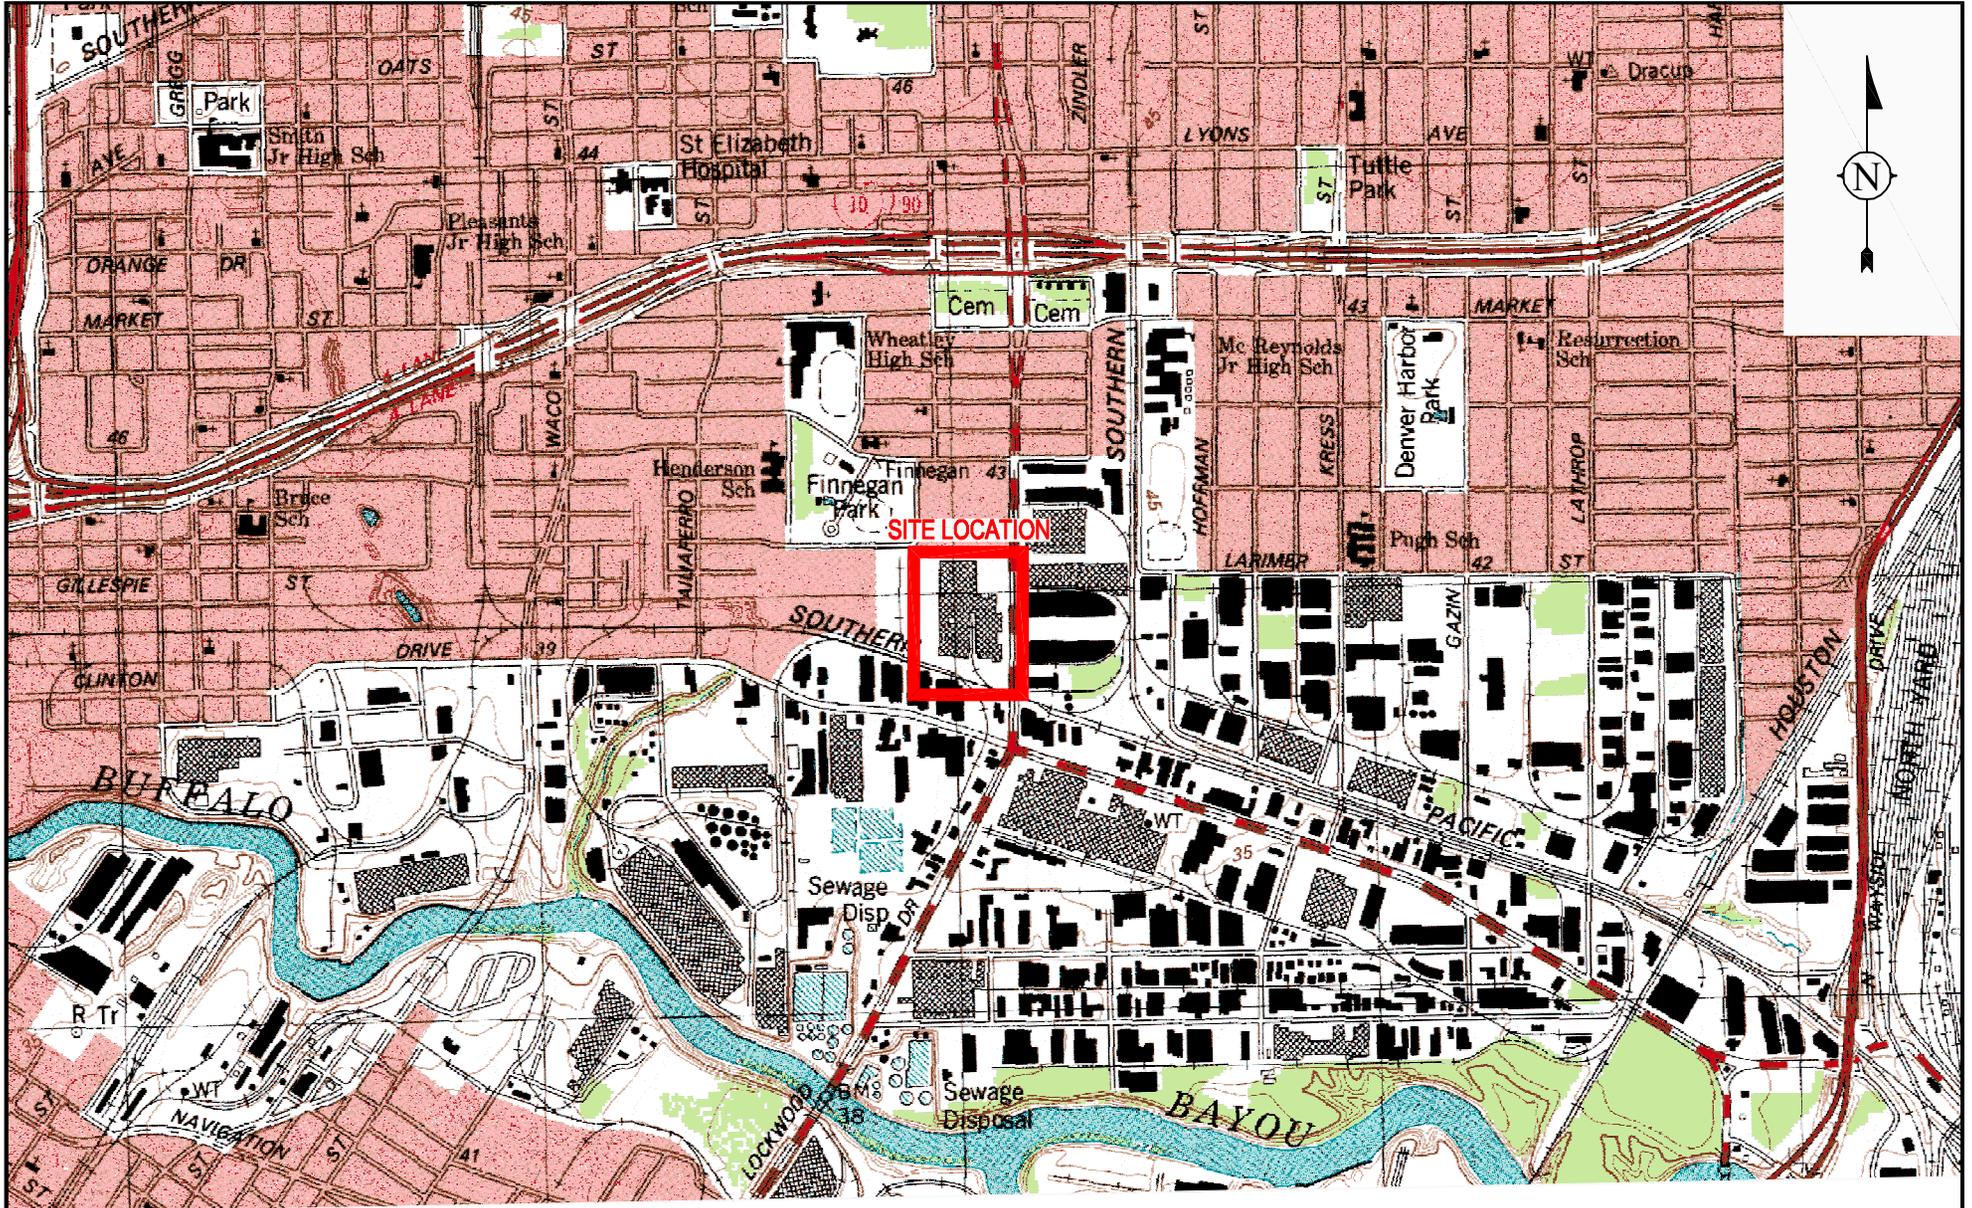

Figures B-9, B-10, B-11 and **B-12** show the ingestion protective concentration level exceedance zones (IPCLEZ) in the upper water-bearing zone for the four COCs – Tetrachlorethene (PCE), Trichloroethene (TCE), cis-1,2-Dichloroethene (cis-1,2-DCE) and Vinyl Chloride (VC), respectively – at the site. **Figures B-13, B-14** and **B-15** show the IPCLEZs for the three COCs detected in the second water-bearing zone including: PCE, TCE and VC.

Appendix C

Current and Future Property Use

Item 3: A description of the current use and, to the extent known, the anticipated uses, of the designated property and properties within 500 feet of the boundary of the designated property.

The former Rheem property (site) is currently owned by Annie D. Adams Family Partnership, Ltd. and occupied by Houston Container & Trailer Marring Company (Con-Tra-Mar), which operates a warehouse for temporary storage and shipping of imported products, including industrial and agricultural materials. The area has been used by industry for many years and it is likely that the property will continue to be used for industrial and/or commercial purposes for the foreseeable future.

Current land use in the vicinity of the property is primarily commercial and light industrial. Many of the surrounding properties are utilized as storage and manufacturing facilities. There is a vacant tract of land owned by Mount Corinth Missionary Baptist Church, located to the west of the property. A public roadway, Lockwood Drive, runs along the eastern property boundary. The commercial/industrial property to the north of the property is operated by Westbrook LLC and was formerly operated by Cameron International Corporation (Cameron). A small residential area and Finnegan Park are located directly west of the former Cameron property and are located within 500 feet of the northwest boundary of the former Rheem property. Railroad tracks border the site to the south.

Appendix D

Ingestion Protective Concentration Level Exceedence Zone Discussion

Item 4: For each contaminant of concern within the ingestions protective concentration level exceedence zone, to the extent known, provide the following:

- a. A description of the ingestion protective concentration level exceedence zone (IPCLEZ) and the non-ingestion protective concentration level exceedence zone (non-IPCLEZ), including a specification of the horizontal area and the minimum and maximum depth below ground surface.**
- b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.**
- c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).**

a) The IPCLEZ is present on both the designated property and on the former Cameron property directly to the north. Constituents in the affected groundwater plume are dissolved chlorinated volatile organic compounds (VOCs) including parent compounds tetrachloroethene (PCE), trichloroethene (TCE), and degradation products cis-1,2-dichloroethene (cis-1,2-DCE) and vinyl chloride. These constituents are present in the upper and second water bearing zones. The upper water-bearing zone begins at approximately 13 to 15 ft below ground surface (bgs) and extends to a confining clay layer approximately 24 to 28 ft bgs. The second water-bearing zone is variable across the site and begins at about 40 to 45 ft bgs and extends to about 50 to 60 ft bgs.

- i. The IPCLEZ for dissolved PCE in the upper water-bearing zone encompasses an area that extends roughly from the southern half of the former Cameron property to the north-central portion of the former Rheem property. The wells in the IPCLEZ and the concentrations in those wells are given in **Table D-1** and a map of the plume is shown in **Figure B-9**.

PCE is present in the second water-bearing zone in areas near Wells MW-17 and MW-19 (on the former Rheem property) and MW-24 (on the former Cameron property). These data have not been contoured because it is not clear whether the concentrations in these wells are connected and represent one continuous plume or smaller isolated areas where constituents have reached the second water-bearing zone. The wells in the IPCLEZ in the second water-bearing zone and the concentrations in those wells are given in **Table D-1** and a map of these locations is shown in **Figure B-13**.

- ii. The IPCLEZ for TCE in the upper water-bearing zone extends from the southern half of the former Cameron property to the north-central portion of the former Rheem property. In addition, ingestion protective concentration levels for TCE have been exceeded at

MW-30 which is located to the west of the former Cameron property. The wells in the IPCLEZ and the concentrations in those wells are given in **Table D-1** and a map of the plume is shown in **Figure B-10**.

TCE is present in the second water-bearing zone in areas near Wells MW-17 and MW-19 (on the former Rheem property) and MW-24 (on the former Cameron property). These data have not been contoured because it is not clear whether the concentrations in these wells are connected and represent one continuous plume or smaller isolated areas where constituents have reached the second water-bearing zone. The wells in the IPCLEZ in the second water-bearing zone and the concentrations in those wells are given in **Table D-1** and a map of these locations is shown in **Figure-14**.

- iii. The IPCLEZ for cis-1,2-DCE in the upper water-bearing zone encompasses an area that extends roughly from the southern half of the former Cameron property to the north-central portion of the former Rheem property. The wells in the IPCLEZ and the concentrations in those wells are given in **Table D-1** and a map of the affected groundwater is provided as **Figure B-11**.

There have not been any exceedences of the ingestion protective concentration level for cis-1,2-DCE in the second water-bearing unit.

- iv. The IPCLEZ for vinyl chloride in the upper water-bearing zone is present from the south central portion of the former Cameron property and extends to the north-central portion of the former Rheem property. The wells in the IPCLEZ and the concentrations in those wells are given in **Table D-1** and a map of the affected groundwater is provided as **Figure B-12**.

The only ingestion concentration level exceedence for vinyl chloride in the second water-bearing zone is at MW-17 which is located on the northern border of the former Rheem property. The concentration in well MW-17 is given in **Table D-1** and a map showing the location of the vinyl chloride occurrence in the second water-bearing zone is provided as **Figure B-15**.

- b) The contamination levels of the COCs in all the wells within the groundwater plume are given in **Table D-1**. The table includes the wells in the upper and second water-bearing zones. The ingestion protective concentration levels, which are also known as the Tier 1 Residential $^{GW}GW_{Ing}$ Protective Concentration Limit (PCL) under the Texas Commission on Environmental Quality's (TCEQ) Texas Risk Reduction Program (TRRP) are given for each COC in mg/L and the contamination level in each well is compared to that value. Exceedences of the ingestion protective concentration level are highlighted in yellow. The non-ingestion protective concentration levels, is the Tier 1 Residential $^{Air}GW_{Inh-V}$ PCL under the TRRP, are also given for each COC in the table in mg/L. There are no exceedences of the non-ingestion protective concentration levels.

- c) The COCs in the IPCLEZ are chlorinated VOCs including PCE and TCE and their daughter products cis-1,2-DCE and vinyl chloride. Chlorinated VOCs can be present as a dense non-aqueous phase liquid (DNAPL) that is denser than water and would be found at the bottom of the water table. However, there is no indication that the COCs at the site are in the DNAPL form. These COCs are present in the dissolved phase and can migrate in the groundwater. The chlorinated VOCs do not migrate in the groundwater at the same speed as the general groundwater velocity due to retardation factors such as adsorption and absorption.

**Table D-1
IPCLEZ and Non-IPCLEZ in Groundwater**

	Tetrachloroethene (PCE)	Trichloroethene (TCE)	cis-1,2-Dichloroethene (cis-1,2-DCE)	Vinyl Chloride

MW-24 (Oct 2007)	0.49	0.062	0.063	<0.00079

IPCLEZ- Ingestion Protective Concentration Level Exceedence Zone

Indicates constituent exceeds Ingestion Protective Concentration Level

Indicates constituent exceeds Non-Ingestion Protective Concentration Level

J - Compound was present but below the laboratory quantification limit.

Wells MW-3 through MW-12 and MW-17 through MW-21 are operated by Rheem. Wells MW-13 through 16, MW-23, MW-24 and MW-30 are operated by Cameron.

Appendix E

Designated Groundwater Discussion

Item 5: For each contaminant of concern within the designated groundwater, to the extent known, provide the following:

- a. A description of the ingestion protective concentration level exceedance zone (IPCLEZ) and the non-ingestion protective concentration level exceedance zone (non-IPCLEZ), including a specification of the horizontal area and the minimum and maximum depth below ground surface.**
- b. The level of contamination, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.**
- c. Its basic geochemical properties (e.g., whether the contaminant of concern migrates with groundwater, floats or is soluble in water).**

- a) As previously mentioned the IPCLEZ is present on both the designated property and on the former Cameron property directly to the north. This MSD application applies to only the groundwater below the former Rheem property. Cameron has committed to submitting its own closure plan to the TCEQ for the former Cameron property. Cameron has informed Rheem that it has contractual rights to restrict groundwater use and to implement other necessary institutional controls to achieve closure at the former Cameron property.

The contaminants of concern (COCs) for the affected groundwater plume are dissolved chlorinated volatile organic compounds (VOCs) including parent compounds (Tetrachloroethene or PCE and Trichloroethene or TCE) and degradation (daughter) products (cis-1,2-Dichloroethene or cis-1,2-DCE and vinyl chloride). The COCs have impacted the upper and second water bearing zones. The upper water-bearing zone begins at approximately 13 to 15 ft below ground surface (bgs) and extends to a confining clay layer approximately 24 to 28 ft bgs. The second water-bearing zone is variable across the former Rheem property and begins between 40 and 45 ft bgs and extends to between 50 and 60 ft bgs.

- i. The IPCLEZ for the designated property for dissolved PCE in the upper water-bearing zone extends from the northern border of the former Rheem facility to the central portion of the former Rheem property. The wells in the designated property in the IPCLEZ and the concentrations in those wells are given in **Table E-1**. **Figure B-9** shows the entire IPCLEZ area but defines the groundwater area to which this MSD application applies. The plume covers a horizontal area of approximately 224,000 square ft.

PCE is present in the second water-bearing zone in areas near Wells MW-17 and MW-19 on the designated property. These data have not been contoured because it is not clear whether the concentrations in these wells are connected and represent one continuous plume or smaller isolated areas where constituents have reached the second water-

bearing zone. The wells in the IPCLEZ in the second water-bearing zone and the concentrations in those wells are given in **Table D-1** and a map of these locations is shown in **Figure B-13**.

- ii. The IPCLEZ for TCE in the upper water-bearing zone extends from the northern boundary of the former Rheem property to the north-central portion of the former Rheem property. The wells in the designated property in the IPCLEZ and the concentrations in those wells are given in **Table E-1**. **Figure B-10** shows the entire IPCLEZ area but defines the groundwater area to which this MSD application applies. The plume covers a horizontal area of approximately 195,000 square ft.

TCE is present in the second water-bearing zone in areas near Wells MW-17 and MW-19 on the designated property. These data have not been contoured because it is not clear whether the concentrations in these wells are connected and represent one continuous plume or smaller isolated areas where constituents have reached the second water-bearing zone. The wells in the IPCLEZ in the second water-bearing zone and the concentrations in those wells are given in **Table D-1** and a map of these locations is shown in **Figure B-14**.

- iii. The IPCLEZ for cis-1,2-DCE in the upper water-bearing zone encompasses an area that extends from the northern boundary of the former Rheem property to the north-central portion of the former Rheem property. The wells in the designated property in the IPCLEZ and the concentrations in those wells are given in **Table E-1**. **Figure B-11** shows the entire IPCLEZ area but defines the groundwater area to which this MSD application applies. The plume covers a horizontal area of approximately 132,000 square ft.

There have not been any exceedances of the ingestion protective concentration level for cis-1,2-DCE in the second water-bearing unit.

- iv. The IPCLEZ for vinyl chloride in the upper water-bearing zone is present from the northern boundary of the former Rheem property and extends to the north-central portion of the former Rheem property. The wells in the designated property in the IPCLEZ and the concentrations in those wells are given in **Table E-1**. **Figure B-12** shows the entire IPCLEZ area but defines the groundwater area to which this MSD application applies. The plume covers a horizontal area of approximately 104,000 square ft.

The only ingestion concentration level exceedance for vinyl chloride in the second water-bearing zone is at well MW-17 which is located on the northern boundary of the former Rheem property. The concentration in well MW-17 is given in **Table E-1**. **Figure B-14** shows the location of this well.

An 8 foot concrete storm sewer line, located several feet below ground surface, is under the former Cameron property a short distance to the north of the boundary between the two properties. This sewer line is connected to and receives flow from a subsurface storm sewer line below Lockwood Drive to the east of the former Cameron property. Cameron has indicated in its submissions to TCEQ that the subsurface storm sewers act as a barrier to most, if not all, transport of constituents of concern, from one side of the sewer to the other (not verified by ARCADIS).

- b) The contamination levels of the COCs in all the wells in the designated groundwater area are given in **Table E-1**. The table includes the wells in the upper and second water-bearing zones. The ingestion protective concentration levels, which are also known as the Tier 1 Residential $^{GW}_{Ing}$ Protective Concentration Limit (PCL) under the Texas Risk Reduction Program (TRRP) from the Texas Commission on Environmental Quality (TCEQ), are given for each COC in mg/L and the contamination level in each well is compared to that value. Exceedances of the ingestion protective concentration level are highlighted in yellow. The non-ingestion protective concentration levels, which are also known as the Tier 1 Residential $^{Air}_{Inh-V}$ PCL under TRRP, are also given for each COC in the table in mg/L. There are no exceedances of these levels.
- c) The COCs in the IPCLEZ within the designated groundwater are chlorinated VOCs including PCE and TCE and their daughter products cis-1,2-DCE and vinyl chloride. Chlorinated VOCs can be present as a dense non-aqueous phase liquid (DNAPL) that is denser than water and would be found at the bottom of the water table. However, there is no indication that the COCs at the former Rheem property are in the DNAPL form. These COCs are present in the dissolved phase and can migrate in the groundwater. The chlorinated VOCs do not migrate in the groundwater at the same speed as the general groundwater velocity due to retardation factors such as adsorption and absorption.

**Table E-1
IPCLEZ and Non-IPCLEZ in Designated Groundwater**

Indicates constituent exceeds Non-Ingestion Protective Concentration Level

J - Compound was present but below the laboratory quantification limit.

Appendix F

Maximum Contaminants of Concern Concentrations

Item 6: A table displaying the following information for each contaminant of concern, to the extent known:

- a. The maximum concentration level for soil and groundwater, the ingestion protective concentration level, and the non-ingestion protective concentration level, all expressed as mg/L units.**
 - b. The critical protective concentration level without the municipal setting designation, highlighting any exceedances.**
- a) **Table F-1** shows the maximum concentrations of PCE, TCE and 1,2-DCE detected in soil sampled across the designated property. The table includes the sample locations, the depth interval from which the samples were collected and the sample collection dates. The maximum detected concentrations of PCE, TCE and cis-1,2-DCE were 6.06, 0.9 and 0.33 mg/kg, respectively. Vinyl chloride was not detected in any soil sample collected from the site but the maximum sample detection limit was 1.4 mg/kg in sample SB-5(b).

The ingestion protective concentration level (IPCL) in soil for cis-1,2-DCE was determined from the Tier 1 Residential ^{GW}Soil_{ing} protective concentration limit (PCL) as set by the TCEQ. The IPCL in soil for PCE, TCE and vinyl chloride were determined from the 2002 Baseline Risk Assessment submitted by ARCADIS and approved by the TCEQ. These values are the calculated Tier 2 PCLs for soil constituents leaching to groundwater. As shown on Table F-1, the historical maximum concentration for 1,2-DCE in soils exceeded the IPCL (i.e. the critical PCL without an MSD). Vinyl chloride was not detected, but its detection limit in soil exceeded the IPCL.

The non-IPCLs in soil for all four contaminants of concern were determined from the Residential Tier 1 ^{Tot}Soil_{comb} PCLs as set by the TCEQ. An exceedance of these PCLs indicates that a risk to human health exists via exposure to the soil through the inhalation, ingestion, dermal contact and vegetable consumption pathways. As shown on Table F-1.2, none of the historical maximum concentrations in soils exceeded any of the non-IPCLs (i.e. the critical PCL with an MSD).

Tables F-2.1 and **F-2.2** indicate the maximum concentrations of the four COCs in groundwater. The tables indicate the maximum concentrations detected in groundwater samples from wells on the designated property during the October 2007 sampling event, as well as the maximum detected concentrations from sampling events conducted since 2000.

The IPCLs for all four contaminants in groundwater were determined from the Tier 1 ^{GW}GW_{ing} PCLs as set by the TCEQ. An exceedance of these PCLs indicates that a risk to human health exists should the groundwater be ingested. As shown on Table F-2.1, the historical maximum concentration for PCE, TCE, 1,2-DCE and vinyl chloride in groundwater exceeded the IPCL (i.e. the critical PCL without an MSD).

The non-IPCLs for all four contaminants in groundwater were determined from the Tier 1 $^{Air}GW_{Inh-V}$ PCLs as set by the TCEQ. An exceedance of these PCLs indicates a risk to human health exists should a person inhale vapors emanating from the groundwater. As shown on Table F-2, none of the historical maximum concentrations in groundwater exceeded any of the non-IPCLs (i.e. the critical PCL with an MSD).

Table F-1
Maximum Constituent Concentrations in Soils

Table F-1.1 - Maximum Constituent Concentrations in Soils Compared to IPCL (i.e. Critical PCL without MSD)

Constituent	IPCL ^{GW} SOIL _{Ing} (mg/kg)	non-IPCL ^{Tot} Soil _{Comb} (mg/kg)	Critical PCL (no MSD) (mg/kg)	Historical Max on Designated Property (mg/kg)	Sample Location	Sample Depth (ft bgs)	Sample Date

Appendix G

Plume Stability Analysis

Item 7: A statement as to whether the plume of contamination is stable, expanding, or contracting, with the basis for that statement.

The affected groundwater extends into the upper and second water-bearing zones. Groundwater in the upper water-bearing zone has been monitored since 1990 while groundwater in the second water-bearing zone has been monitored since 2000. A discussion of the plume stability in each zone is discussed below.

Upper Water-Bearing Zone

Figures G-1 to G-4 are time-series maps that show the plume stability in the upper water-bearing zone and illustrate that the general concentrations have declined. These time-series maps show that since 2000, the footprints of the affected groundwater in the upper water-bearing zone have generally remained stable or shrunk, as a result of natural attenuation processes.

Figure G-1 shows that, in general, the footprint of the PCE plume beneath the former Rheem property has remained stable. The time-series maps show that the overall strength of the PCE plume has generally declined, especially in the area near well MW-7, which has historically shown the highest concentrations beneath the former Rheem property. PCE concentrations over the last six years in well MW-7 have declined from 1.36 mg/L to 0.885 mg/L.

The time-sequence maps for TCE, provided in **Figure G-2**, show that the footprint of the TCE plume has remained stable. The TCE plume maps show a significant reduction in constituent concentration in the central portion of the former Rheem property. A comparison between the 2002 and 2007 contour maps show that the area beneath the former Rheem property that historically contained TCE concentrations greater than 1.00 mg/L has disappeared.

The time-sequence maps for cis-1,2-DCE, provided in **Figure G-3**, show that the footprint of the cis-1,2-DCE plume beneath the former Rheem property has shrunk and the concentration of the plume has declined. The cis-1,2-DCE maps show a significant reduction in constituent concentration in the central portion of the former Rheem property near well MW-7, which has historically contained the highest constituent concentrations. A comparison between the 2002 and 2007 contour maps show that the cis-1,2-DCE concentrations in well MW-7 decreased from 0.381 mg/L in 2002 to 0.195 mg/L in 2007. During that same timeframe, cis-1,2-DCE concentrations in wells MW-11 and MW-12 dropped below the IPCL (0.070 mg/L).

The time-sequence maps for vinyl chloride (**Figure G-4**) show that concentrations in the area on the Rheem property that has historically shown the highest concentrations of vinyl chloride (the area extending between MW-3 and MW-7) have declined sharply. Between 2002 and 2007 vinyl chloride concentrations in wells MW-3 and MW-7 declined from 0.0882 mg/L to 0.0125 mg/L and 0.00797 mg/L to 0.0048 mg/L, respectively. Only three wells on the former Rheem property contained vinyl chloride concentrations detected in exceedance of the Ingestion Protective Concentration Level (IPCL) during the most recent sampling event in October 2007 (Wells MW-3, MW-7 and MW-18).

The general decline in constituent concentrations is further demonstrated by the graphs provided in **Appendix G**. Long-term data trends show overall decreasing groundwater concentrations across the former Rheem property. Graphs for Wells MW-2, MW-6, MW-7, MW-8, MW-10, MW-11, MW-12, MW-13, MW-14, MW-15, and MW-16 (**Figures G-5, G-7, G-8, G-9** and **G-11 to G-17**, respectively) show decreasing concentration trends, while graphs from wells MW-3 and MW-23 (**Figures G-6** and **G-19**) show stable trends. These stable and decreasing trends indicate a lack of ongoing residual source material and the affect of natural attenuation, resulting in plume stability and local contaminant reduction. While the overall trends in Well MW-9 have increased since 2000, constituent concentrations appear to have reached a peak in 2004, and have declined or remained stable since that time. Trends have also shown slightly increased concentrations in Well MW-18. However, because of its central location within the affected groundwater plume, along with the overall declining footprint of the plume, these trends do not indicate plume instability, but a general fluctuation of concentrations in the interior of the plume.

Constituents present in the upper water-bearing zone beneath the former Cameron property are being addressed by Cameron as part of an approved remedial action plan.

An 8 foot concrete storm sewer line, located several feet below ground surface, is under the former Cameron property a short distance to the north of the boundary between the two properties. This sewer line is connected to and receives flow from a subsurface storm sewer line below Lockwood Drive to the east of the former Cameron property. Cameron has indicated in its submissions to TCEQ that the subsurface storm sewers act as a barrier to most, if not all, transport of constituents of concern, from one side of the sewer to the other (not verified by ARCADIS).

Second Water-Bearing Zone

Of the eleven monitoring wells completed in the second water-bearing zone across the two properties (Wells MW-17, MW-19, MW-20, MW-24, MW-26, MW-27, MW-28, MW-29, MW-34, MW-35 and MW-36), only samples from wells MW-17, MW-19 and MW-24 have contained chlorinated solvent constituents. Of the constituents of concern, only PCE and TCE have been regularly detected above the IPCL in samples from the second water-bearing zone. Graphs showing the concentrations over time for wells MW-17, MW-19 and MW-24 are provided in **Appendix G** as **Figures G-20 to G-22**, respectively. As shown in the graphs, well MW-17 has shown stable constituent concentrations since 2000, while concentration trends in wells MW-19 and MW-24 have increased slightly over time. Wells MW-27, MW-28 and MW-29, formerly located west (down-gradient) of the former Rheem property and have since been plugged at the request of the property owner, historically showed no detectable concentrations of any constituents associated with the former Rheem property. Based on these findings, there is no evidence that affected groundwater in the second water-bearing zone has migrated off-site.

Constituents present in the second water-bearing zone beneath the former Cameron property are being addressed by Cameron as part of an approved remedial action plan.

Appendix H

Exceedances Without a MSD

Item 8: A statement as to whether contamination on and off the designated property without a municipal setting designation exceeds a residential assessment level as defined in the Texas Risk Reduction Program (TRRP) or analogous residential level set by EPA, if known, and the basis for that statement.

As was discussed in **Appendix D**, there are four chlorinated volatile organic compounds (VOCs), including tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE) and vinyl chloride that exceed the TRRP residential assessment levels for groundwater. These constituents are present on and off the designated property and in the upper and second water-bearing zones at levels that exceed the TRRP residential protective concentration limits (PCLs).

Exceedences On the Designated Property

In the upper water-bearing zone on the designated property, exceedences of the TRRP residential PCLs of one or all of the constituents (PCE, TCE, 1-2-DCE and vinyl chloride) were detected in Wells MW-3, MW-6, MW-7, MW-9, MW-11 and MW-12 during the October 2007 sampling event and during historical sampling activities.

In the second water-bearing zone on the designated property, exceedences of the TRRP residential PCLs for PCE, TCE and vinyl chloride have been detected in on-site monitoring wells including Wells MW-17 and MW-19.

Exceedences Off the Designated Property

Chlorinated volatile organic compounds were released to the groundwater from the former Cameron property directly to the north. The areas of affected groundwater appear to have comeingled near the property boundary. Affected groundwater beneath the former Cameron property is being addressed by Cameron, as part of their TCEQ-approved remedial action plan.

In the upper water-bearing zone on the former Cameron property, exceedences of the TRRP residential PCLs of one or all of the COCs were detected in Wells MW-13, MW-14, MW-15, MW-16 and MW-23 during the October 2007 sampling event and during historical sampling activities. In addition, TRRP residential PCL exceedences for TCE have been noted in the most recent sampling event and in historical sampling events at Well MW-30 located to the west of the former Cameron property. This occurrence is also being addressed by Cameron as part of their TCEQ-approved remedial action plan.

In the second water-bearing zone on the former Cameron property, exceedences of the TRRP residential PCLs for PCE and TCE were detected in Well MW-24 during the October 2007 sampling event and during historical sampling activities.

MSD Application
Former Rheem
Manufacturing Company
Property

There is no indication that the VOC constituents are present at concentrations that exceed the TRRP residential PCLs on the properties to the east, south and west of the designated property.

Appendix I

Exceedances With MSD

Item 9: A statement as to whether contamination on and off the designated property with a municipal setting designation will exceed a residential assessment level as defined in the Texas Risk Reduction Program (TRRP) or analogous residential level set by EPA, if known, and the basis for that statement.

Historical exceedances of the TRRP residential protective concentration levels (PCLs) in Wells MW-3, MW-6, MW-7, MW-9, MW-11, MW-12, MW-17 and MW-19 have not exceeded the $^{Air}GW_{Inh-V}$ PCL. The $^{Air}GW_{Inh-V}$ PCL is the non-ingestion PCL for groundwater which would be the applicable assessment PCL for the property if there was no pathway for human ingestion of the contaminated groundwater. Thus, upon approval of a MSD for the former Rheem property there will not be any exceedances of TRRP residential assessment levels on the designated property in the upper and second water-bearing zones.

Affected groundwater containing constituents above the TRRP residential PCLs in off-site areas to the north are being addressed by Cameron, as part of their TCEQ-approved remedial action plan.

Appendix J

Contamination Origin

Item 10: *Identification of the points of origin of the contamination and the persons responsible for the contamination to the extent known.*

Groundwater beneath the former Rheem property and the former Cameron property is affected with chlorinated solvent constituents including tetrachloroethene, trichloroethene, 1,2-dichloroethene, and vinyl chloride. These affected groundwater zones beneath these two properties appear to have originated from two separate sources and then comingled near the property boundary.

Although significant soils investigations have been conducted, the exact source of the chlorinated constituents at the former Rheem property has not been identified. The highest concentrations of constituents in the soils were identified in samples collected from backfill materials used to fill in a historical drainage ditch located near the north end of the warehouse buildings. U.S. Government maps of the former Rheem property from February and November 1945 indicated that an earthen gully and an unlined drainage ditch were present on the property prior to construction activities in November 1945. Results from soils investigations showed chlorinated solvent constituents in the shallow backfill material in the former ditch, but samples collected from below the backfill material did not contain chlorinated solvents. A 1994 assessment report concluded that the chlorinated solvents did not enter the groundwater at these locations, but that the drainage features represented possible migration pathways and/or sources for the dissolved chlorinated solvents (Geraghty & Miller, 1994).

Soils data collected from the Cameron property and reported by representatives of Cameron suggest that the affected groundwater associated with the former Cameron property appears to have originated from a source or sources in or near the former machine shop on the former Cameron property.

Appendix K

Environmental Regulatory Actions

Item 11: A description of any environmental regulatory actions that have been taken within the past five years in connection with the designated property, to the extent known.

Not applicable. No environmental regulatory actions have been taken in the past five years. A pending action, taken far longer than five years ago, has been stayed.

Appendix L

Property Registrations

Item 12: A listing of all existing state or EPA registrations, permits, and identification numbers that applies to the designated property.

TCEQ Order Docket No. 1999-0432-IHW-E
IHW No. 30662 (Inactive)

Appendix M

Texas Voluntary Cleanup Program Status

MSD Application
Former Rheem
Manufacturing Company
Property

Item 13: A statement as to whether the designated property has been admitted to the Texas Voluntary Cleanup Program (section 361.601 of the Texas Health & Safety Code, as may be amended from time to time) or similar state or federal programs, and a description of the status of the designated property in the program.

The designated property has not been admitted to the Texas Voluntary Cleanup Program. However, the TCEQ remediation group is overseeing the closure. The applicant and the former owner, Rheem Manufacturing, are working cooperatively with TCEQ. Rheem has submitted a Remedial Action Plan (RAP) to TCEQ for approval. In a letter dated July 30, 2008, the TCEQ indicated that it will acknowledge final closure of the designated property pursuant to a monitored natural attenuation remedy that utilizes a MSD.

Appendix N

Environmental Site Assessment Reports Summary

Item 14: A summary of any environmental site assessment reports filed with TCEQ regarding any site investigations or response actions that are planned, ongoing or completed related to the designated property.

- Remedial Action Report, dated August 31, 1990
- Characterization of Metallic Scale Deposit, dated October 29, 1990
- Phase II Site Assessment, dated December 28, 1990
- Phase II Characterization of Metallic Scale Deposit, dated February 1991
- Additional Phase II Site Assessment Report, dated November 16, 1993
- Soil Investigation Report, dated May 10, 1994
- June 1997 Groundwater Monitoring Report, dated August 12, 1997
- Supplemental Investigation, dated August 29, 1998
- Rheem's Comments on Cooper's Remedial Investigation Report, dated March 1, 2001
- Soil and Groundwater Investigation Report, dated April 10, 2001
- Quarterly Groundwater Monitoring Report, dated June 22, 2001
- Quarterly Groundwater Monitoring Report, dated October 31, 2001
- Quarterly Groundwater Monitoring Report, dated December 11, 2001
- Annual Groundwater Monitoring Report, dated May 2002
- Baseline Risk Assessment, dated December 30, 2002
- Remedial Investigation Report, dated December 30, 2002
- Semi-Annual Groundwater Monitoring Report, dated May 30, 2003
- Annual Groundwater Monitoring Report, dated December 11, 2003
- Addendum to the Remedial Investigation Report, dated June 3, 2004

- Semi-Annual Groundwater Monitoring Report, dated June 4, 2004
- Annual Groundwater Monitoring Report, dated December 30, 2004
- Addendum to the December 2002 Baseline Risk Assessment, dated October 28, 2005
- Annual Groundwater Monitoring Report, dated December 30, 2005
- General Proposal for Site Closure letter to TCEQ, dated December 21, 2006
- Annual Groundwater Monitoring Report, dated December 22, 2006
- Remedial Action Plan, dated June 28, 2007
- Annual Groundwater Monitoring Report, dated December 28, 2007
- Response to TCEQ November 19, 2007 Request for Additional Information, dated April 14, 2008
- TCEQ response to the April 14 2008 submittal. The letter approved the recommended monitored natural attenuation remedy utilizing a MSD and requested quarterly updates on the status of the MSD application with the City of Houston.

Appendix O

Public Water Supply Availability

Item 15: A statement as to whether any public drinking water supply system exists that satisfies the requirements of Chapter 341 of the Texas Health and Safety Code and that supplies or is capable of supplying drinking water to the designated property and the properties within one-half mile of the designated property and the identity of each supply system.

The City of Houston currently supplies public water to the designated property and to the properties within ½ mile, and has the capability to continue service to these areas. According to the City of Houston Department of Public Works and Engineering's Drinking Water Quality Report for 2006, the public drinking water supplied to the designated property by the City of Houston "met and exceeded all Federal and State standards for safe drinking water." This water supply satisfies the requirements of Chapter 341 of the Texas Health and Safety Code.

Drinking Water Quality Report 2006

City of Houston
Department of
Public Works &
Engineering

City of Houston Department of Public Works and Engineering DRINKING WATER QUALITY REPORT 2006

Houston's Water is rated Superior!

This report contains information about your drinking water and the treatment and monitoring performed to serve the highest possible quality of water to you.

You can be assured that **Superior Drinking Water** is being provided to you and approximately 2.7 million other customers in the Greater Houston Metropolitan Area. **In 2006, Houston drinking water met and exceeded all Federal and State standards for safe drinking water.** The City of Houston has maintained a **five-year record of providing safe and reliable drinking water of Superior Quality.** There were no water quality violations for treated water or the water distribution system for 2006. In addition, the city participated voluntarily in the **Partnership for Safe Drinking Water** to produce water of a quality better than most other water providers in the nation. This report contains information about the presence of contaminants in your drinking water. The presence of these contaminants does not indicate that the water poses a health risk, as all drinking water may reasonably be expected to contain at least small amounts of contaminants.

City of Houston Sources of Drinking Water

Sources of drinking water include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally occurring minerals and in some cases, radioactive materials, and can pick up substances resulting from the presence of animal or human activity.

The total production from all sources averaged 392 million gallons per day (MGD) in 2006. There is enough water in our distribution system at any given time to fill the Astrodome 2 ½ times. The City currently draws 71% of its treated drinking water from its major surface water treatment plants. Surface water

comes from the San Jacinto River through Lake Conroe and Lake Houston, and the Trinity River, through Lake Livingston. The remaining 29% comes from groundwater wells. These are deep wells with average depths greater than 750 feet, producing water from the Evangeline and Chicot Aquifers, and are not vulnerable to surface contamination. For information please call one of our professional customer service staff at 713-837-0473.

Public Utilities Mission Statement

To be the Nation's Leading Public Utility, Champion for the Environment, Providing Reliable Service of Exceptional Quality to the Most Satisfied Customers in the Nation.

City of Houston Drinking Water Service Areas

The City of Houston uses chloramines for the disinfection of its drinking water. This protects public health by controlling central exposure to waterborne organisms known to cause infectious diseases in humans, while at the same time lowering regulated disinfection by-products. For certain sensitive uses such as kidney dialysis, chlorinated water must be treated before use.

DISINFECTION BY-PRODUCTS AND DISINFECTANTS*							
	MCL	MCLG	Average of all sampling points		Range of detected levels		Source of Constituent
			MAIN SYSTEM	HOUSTON AREA WATER CORP.	MAIN SYSTEM	HOUSTON AREA WATER CORP.	
HALOACETIC ACIDS - HAAS (ppb)	60 as Running Annual Average (RAA) of quarterly samples in distribution system	N / A	13.4	9.9	< 6.0 - 90.7	6.3 - 15.7	By-product of drinking water disinfection
TOTAL TRIHALOMETHANES - TTHMS (ppb)	80 as Running Annual Average (RAA) of quarterly samples in distribution system	N / A	15.9	11.2	< 8.0 - 69.3	< 8.0 - 19.1	By-product of drinking water disinfection
CHLORAMINES/FREE CHLORINE (ppm)	MRDL = 4 as Running Annual Average (RAA) of daily distribution system samples	MRDLG = 4	Free Chlorine = 1.4 Chloramine = 2.5	Free Chlorine = 1.4 Chloramine = 2.5	0.2 - 3.9	0.2 - 3.9	Disinfectant used to control microbes

During 2006, the City of Houston collected more than 600,000 laboratory samples for containments in its source water, treated water and distribution system.

Total Xylenes (ppm)	10	10	< 0.0015	< 0.0015	0.0016	0.0126	< 0.0015	< 0.0015	Discharge from petroleum factories; discharge from chemical factories

Terminology

Action Level (AL): The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL): The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG): The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL): The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG): The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Treatment Technique (TT): A required process intended to reduce the level of a contaminant in drinking water.

Measurement Definitions

Nephelometric Turbidity Unit (NTU): Turbidity is a measure of how clear the water looks.

N/A: Not Applicable

ND: Not Detected

pCi/L: picocuries per liter (a measure of radioactivity)

ppm: 1 part per million = 1 mg/L = 1 milligram per liter

ppb: 1 part per billion = 1 ug/L = 1 microgram per liter

1 ppm = 1000 ppb

* Calendar Year 2006 data unless otherwise specified.

** Includes groundwater and surface water sites.

*** EPA considers 50 picocuries per liter to be the level of concern for beta particles.

**** MCL compliance is based on annual average of samples.

Is *Giardia* or *Cryptosporidium* in our water supply?

Cryptosporidium and *Giardia* are waterborne pathogenic organisms. Both are naturally present in the intestines of most mammals including humans, and are passed into the environment through urban runoff or sewage disposal system failure. The diseases caused by *Cryptosporidium* or *Giardia* can lead to symptoms such as diarrhea, abdominal discomfort, fever, weight loss, malabsorption, or anemia. Although not life threatening to healthy adults, *Cryptosporidium* and *Giardia* can be fatal to infants, the elderly, pregnant women, and immunocompromised persons.

Neither *Giardia* nor *Cryptosporidium* is found in deep wells such as the City's, which are protected from surface water contamination. We routinely monitor our source water entering and treated water leaving our filtration plants for these two organisms. To date, we have detected no confirmed occurrences of either organism in any of our drinking water.

UNREGULATED CONTAMINANTS*													
Unregulated contaminants are those for which the EPA has not established drinking water standards. The purpose of unregulated contaminant monitoring is to assist the EPA in determining the occurrence of unregulated contaminants in drinking water and whether future regulation is warranted.

Drinking Water and Your Health

Notice from the EPA

All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. Contaminants may be found in drinking water that may cause taste, color, or odor problems. Presence of contaminants does not necessarily indicate that the water poses a health risk. In order to ensure that tap water is safe to drink, the EPA and the TCEQ enforce regulations that limit the amount of certain contaminants in water provided by public water systems. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline 1-800-426-4791.

Health-Related Notices

Special Notice for the Elderly, Infants, Cancer Patients, People with Weakened Immune Systems

You may be more vulnerable to certain microbial contaminants in drinking water than the general population. Infants, some elderly or immunocompromised persons such as those who have undergone chemotherapy for cancer, those who have undergone organ transplants, those who are undergoing treatment with steroids, and people with HIV/AIDS or other immune system disorders can be particularly at risk from infections. You should seek advice about drinking water from your physician or health care provider. Additional guidelines on appropriate means to lessen the risk of infection by microbial contaminants are available from:

Safe Drinking Water Hotline 1-800-426-4791 or City of Houston Department of Health and Human Services/Bureau of Epidemiology 713-794-9181.

If other people, such as tenants, receive water from you, it is important that you provide this notice to them by posting it in a prominent location or by hand or mail delivery.

Please feel free to copy this report. Visit our web site:

www.publicworks.cityofhouston.gov/utilities/waterprod.htm

H₂Ouston Drinking Water Operations Delivers!

Quality

We work hard to bring you one of the highest quality drinking water in the nation! Houston's drinking water is rated "**Superior**" by TCEQ, meaning we have exceeded its expectations of a water utility. This includes not only bringing you great tasting water but taking extra efforts to protect our water sources.

The City of Houston actively participates with the **American Water Works Association (AWWA)** and other agencies that research water quality issues. Such research helps us optimize and improve our drinking water operations.

The City also participates in programs such as the **Partnership for Safe Drinking Water**. This program ensures that preventative measures are being optimized at our treatment plants to increase performance and protection against microbiological contamination in the Houston drinking water supply.

Reliability

The City of Houston's Waterworks has been in place since the early 1900's, ensuring dependable water service to over 2,700,000 customers. This includes operating three water purification complexes and maintaining over 7,000 miles of water pipelines.

Recently, the City's of Houston's water purification plants have been nationally recognized among the most elite water plants in the nation. The East Water Purification Plant recently won the **2006 Five-Year Directors Award** for achieving excellence in water purification maintenance. This award is given to utilities' which meet or exceed water quality standards established by the **Partnership for Safe Drinking Water**.

Service

The City of Houston operates a non-emergency help line-**311**. Customers can dial this number to notify us of any problems they may be experiencing and a water quality investigator will be dispatched within twenty-four hours to respond to and resolve the problem. In addition, Houston Drinking Water Operations operates a 24-hour control center to remotely monitor system conditions at all its facilities. This control center assists with responding to system problems before they affect the customers.

En Español

Este informe contiene información muy importante sobre de su agua que bebe. Tradúzcalo, ó hable con alguien que lo entienda. Para mas información por favor llame Línea de Ayuda de Houston marcando 311.

Appendix P

Water Well Owners

Item 16: *The name and address of each owner or operator of a water well registered or permitted by the state or the Houston-Galveston Subsidence District that is located within five miles of the boundary of the designated property, along with:*

- a. A map showing the location of each well and, to the extent known, a notation of whether each well is used for potable water.***

- b. A statement as to whether the applicant has provided notice to each owner in compliance with section 361.805 of the Texas Health and Safety Code.***

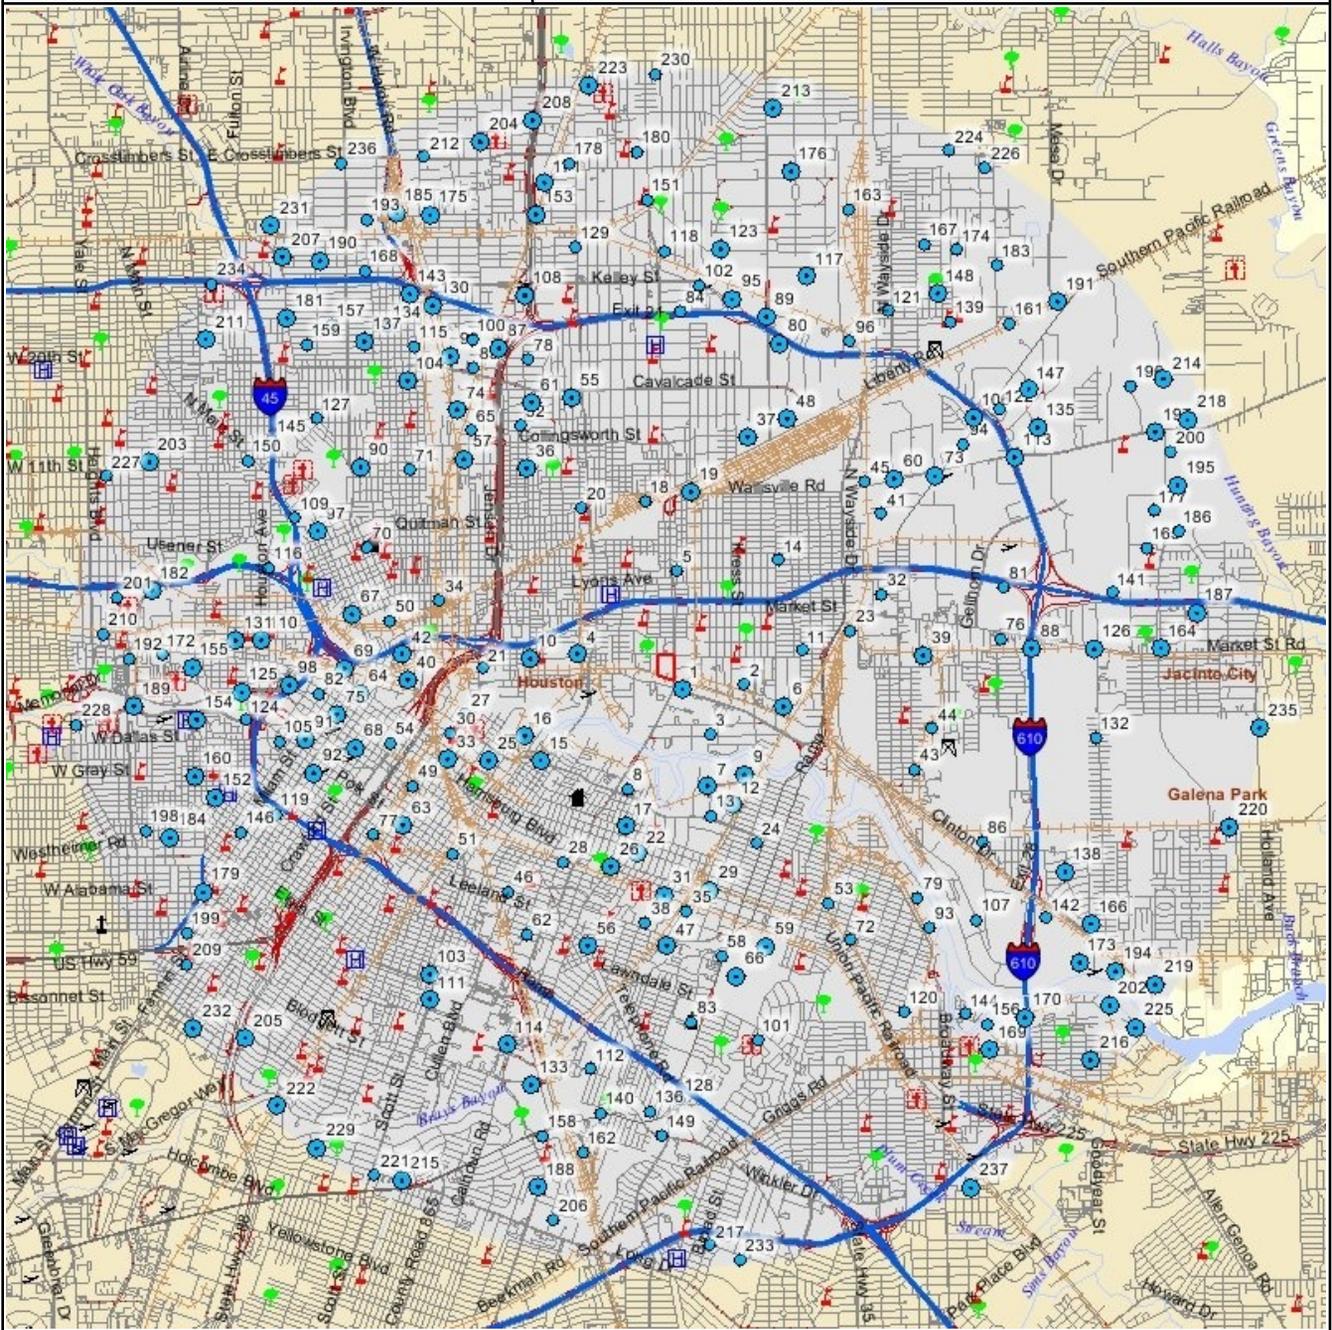

Included in **Table P-1** is a list of all the water wells registered or permitted by the state or the Houston-Galveston Subsidence District within 5 miles of the designated property. An electronic copy of **Table P-1** has been provided to the City of Houston to assist with submittal of notices to the well owners. Notice has not yet been provided to the owners or operators of these wells in accordance with section 361.805 of the Texas Health and Safety Code. **Figure P-1** is a map of the location of the wells.

Appendix Q

Retail Public Utilities

Item 17: The name and address of each retail public utility, as defined in section 13.002 of the Texas Water Code, that owns or operates a groundwater supply well within five miles of the boundary of the designated property, along with a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code.

Table Q-1 includes all the retail public utilities that own or operate at least one groundwater supply well within five miles of the designated property. These entities have not yet been provided notice as required.

Appendix R

Municipalities Within ½ Mile of Designated Property

Item 18: A listing of each municipality, other than the City of Houston, with a corporate limit within one-half mile of the boundary of the designated property, and a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code.

Not Applicable. There are no municipalities other than the City of Houston with a corporate limit within one-half mile of the designated property.

Appendix S

Municipalities With Groundwater Wells Within Five Miles of Designated Property

Item 19: A listing of each municipality, other than the City of Houston, that owns or operates a groundwater supply well within five miles of the boundary of the designated property, and a statement as to whether the applicant has provided notice as required by section 361.805 of the Texas Health and Safety Code.

The following municipalities operate at least one groundwater well within five miles of the boundary of the designated property. These municipalities have not yet been provided notice as required.

- City of Jacinto City
- City of Galena Park

Appendix T

Real Property Owners Within 2,500 ft of the Designated Property

Item 20: A listing of owners of real property within 2,500 ft. of the boundary of the designated property as indicated by the most recent appraisal district records. (Include pre-printed mailing labels)

Table T-1 includes a list of the real property owners within ½ mile of the designated property. An electronic copy of **Table T-1** has been submitted to the City of Houston and has been included on the CD in **Appendix P**.

Appendix U

Signed Statement Indicating No Contaminant Exceedences of Non-Ingestion Protective Concentration Levels Offsite

Item 21: The following statement signed and sealed by a licensed professional engineer or licensed professional geoscientist authorized to practice in the State of Texas with expertise in environmental remediation:

To the best of my knowledge and belief, based upon a review of all public and private records and other information sources available to me in the exercise of due diligence, the opinions stated and conclusions made in this application are supported by such information, and the technical and scientific information submitted with the application is true, accurate and complete. Based on such review, the contaminants of concern from sources on the designated property or migrating from or through the designated property more likely than not do not exceed a non-ingestion protective concentration level on property beyond the boundaries of the designated property.

Laurie Rodriguez, P.G.
Project Manager
ARCADIS U.S., Inc.

Appendix V

Determination of Offsite Exceedences of the Non-Ingestion Protective Concentration Levels

Item 22: If the licensed professional engineer or licensed professional geoscientist determines that contaminants of concern from sources on the designated property are migrating from or through the designated property more likely than not do exceed a non-ingestion protective concentration level on property beyond the boundary of the designated property, then the applicant must:

- a. Specify the name and address of the owner of each property.**
- b. Send a copy of the application to the owner of the property with the notice of the public meeting.**
- c. Provide documentation that the designated property has been included in a state or federal program that requires that the entire non-ingestion protective concentration level exceedance zone be addressed to the satisfaction of the agency administering the program, along with documentation of the estimated time period in which it is to be addressed. An example of such a program is the Texas Voluntary Cleanup Program (section 361.501 of the Texas Health and Safety Code, as may be amended from time to time).**
- d. Provide documentation upon completion of the state or federal program showing that the non-ingestion protective concentration level exceedences have been addressed to the satisfaction of the agency administering the program.**

Not Applicable. It is not believed that the contaminants of concern from sources on the designated property that are migrating from or through the property exceed the applicable non-ingestion protective concentration levels on properties beyond the boundary of the designated property.

Appendix W

Certified Statement of Completeness and Accuracy

Item 23: The following statement certified by the applicant and any authorized representatives of the applicant(s) listed in the application:

I certify under penalty of law that this application and all attachments were prepared under my direction or supervision in a manner designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the persons responsible for gathering and evaluating the information, the information submitted is, to the best of my knowledge and belief, true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of a fine and imprisonment for knowing violation.

Appendix X

TCEQ Application

Item 24: A copy of the TCEQ application, if it has been filed, excluding attachments.

A copy of the draft TCEQ application has been included without the associated attachments and supporting documentation. The application will not be submitted to the TCEQ until MSD approval has been granted by the City of Houston.

Texas Commission on Environmental Quality Municipal Setting Designation Application Form

Instructions

Application Form: Submit this application form to the TCEQ when applying for a Municipal Setting Designation (MSD) Certificate. The MSD application process is governed by Texas Health and Safety Code (THSC) Chapter 361, Subchapter W. Failure to use this application form will result in denial of the application [THSC §361.804(b)(1)].

In general, the application form is self-explanatory. Indicate by checking "Yes" or "No" or "NA" in response to the stated question. "NA" means not applicable. Some responses have a footnote on the response. Be sure to read all footnotes. A recommendation is made to not submit an application when certain circumstances would result in denial of the application. Complete the form electronically and submit an electronic copy of the form along with a paper copy of the form and supporting information. If any of the responses on the form require more space than is provided in the form, add the additional information to the end of the form and note that additional information is included in the answer space.

Supporting Information: Certain information must be provided to meet the requirements of THSC Chapter 361, Subchapter W, and to facilitate review of the application. A checklist is provided to ensure the necessary information is included with the application. Except as stated below or in the checklist, the information is not required to be submitted in any particular format, except that it must be clear, complete, concise, and correct. Present the completed checklist and the requested information in the sequence set in the checklist.

Maps: Various mapped information is requested. All maps must be accurate, and drawn to-scale. The supporting information can be consolidated on fewer maps than are listed in the Supporting Information Checklist provided the information is legible.

Supporting Information Item 3. Legal description of the MSD: Submit a metes and bounds description and plat map that clearly demarcates the MSD property certified by a registered professional surveyor registered by the Texas Board of Professional Surveying attesting to the accuracy of its descriptions, or a lot and block legal property description listing the lot number(s) and block number(s) followed by a reference to a subdivision tract recorded in the county property records. An adequate legal property description would include the volume and page number of the County Deed record where the lot and block are described (e.g., Lots 9 and 10 in Block 11, of Richey Addition, a subdivision in Harris County, Texas, according to the map or plat thereof recorded in Volume 1, Page 550, of the Deed Records of Harris County, Texas).

Mailing: Submit the application form and all supporting information to:

Municipal Setting Designation Application Form

TCEQ Office Use Only: Application No: _____ Date Received: / /	Date Add. Info Req. / / Date Add. Info Rec'd / / Date Certified: / / Date Denied: / /
---	--

Municipal Setting Designation Eligibility Criteria:

Is the proposed municipal setting designation (MSD) within the corporate limits of a municipality authorized by statute?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ¹
Is the proposed municipal setting designation (MSD) within the extraterritorial jurisdiction of a municipality authorized by statute?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ¹
Municipality name: _____		
Is there a public drinking water supply system that satisfies the requirements of THSC Chapter 341 and supplies or is capable of supplying drinking water to: a) the proposed MSD property, and b) each property within 0.5 miles beyond the boundary of the proposed MSD?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ¹
¹ If No, the eligibility criteria are not met. Do not submit an application.		

Applicant and Fee Payment Information:

Contact Person: <input type="checkbox"/> Mr. <input type="checkbox"/> Ms.		
Title: _____		
Company: _____		
Mailing Address: _____		
City: _____	State: _____	Zip: _____
Telephone: / /	Telefax: / /	
E-mail Address: _____		
Is the required \$1,000 application being submitted to TCEQ in advance or at the same time the MSD application is being submitted to TCEQ?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ²
² Do not submit application.		

MSD Property Address:

Street Address: _____		
City: _____	Zip: _____	
County: _____	Acres: _____	
If multiple properties provide an attachment to the application providing the above information for each property.		

Notice Information:

<u>On</u> or <u>before</u> the date of submission of the application to TCEQ, was notice provided to:		
a) each municipality:		
1) where the proposed MSD is located?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ⁴
2) with a border within 0.5 miles beyond the proposed MSD boundaries?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ³ <input type="checkbox"/> NA ⁴
3) that owns or operates a groundwater supply well located within five miles beyond the proposed MSD boundaries?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ³ <input type="checkbox"/> NA ⁴
b) each current owner of a private well registered with the commission and located within five miles beyond the proposed MSD boundaries?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ³ <input type="checkbox"/> NA ⁴

c) each retail public utility, as defined by Texas Water Code, §13.002, that owns or operates a groundwater supply well located within five miles beyond the proposed MSD boundaries?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ³	<input type="checkbox"/> NA ⁴
³ Do not submit application.			
⁴ NA only when no such municipality, private well owner, or retail public utility exists			

MSD Information:

List all existing TCEQ and US Environmental Protection Agency registration, permit, identification numbers (e.g., SWR No., VCP No., LPST ID No., UIC Registration No., PWS ID. No.), if any, that apply to the groundwater contamination situation within the proposed MSD boundary. State "none" if none applicable.		
Is the proposed designated groundwater contaminated in excess of an applicable potable water ⁵ use standard (i.e., 30 TAC 350, ^{GW} GW _{ing})?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ⁶
Was the groundwater contamination previously reported to the TCEQ? (To support implementation of HB 3030, 78 th Legislature.)	<input type="checkbox"/> Yes, when? / /	<input type="checkbox"/> No
Is there a potable-use well within the boundary of the proposed MSD that uses the designated groundwater as source water?	<input type="checkbox"/> Yes ⁶	<input type="checkbox"/> No
Is there a potable-use well within the boundary of the proposed MSD that uses a deeper groundwater zone for the source water that is not properly sealed off from the designated groundwater?	<input type="checkbox"/> Yes ⁶	<input type="checkbox"/> No
Is the applicant aware of any non-consumptive use of the groundwater or other human health or ecological exposure pathways that are of concern? If yes, specify:	<input type="checkbox"/> Yes	<input type="checkbox"/> No
Has each municipality and retail public utility identified in §361.8065 provided firm commitment to adopt an ordinance or resolution in support of the application?	<input type="checkbox"/> Yes	<input type="checkbox"/> No ⁶
Is a copy of the ordinance or restrictive covenant that restricts consumptive use and appropriately restricts other uses of and contact with the designated groundwater, and any required resolutions provided with this application?	<input type="checkbox"/> Yes	<input type="checkbox"/> No
⁵ "Potable water" means water that is used for irrigating crops intended for human consumption, drinking, showering, bathing, or cooking purposes [THSC §361.801(2)].		
⁶ Do not submit an application.		

I affirmatively state that (place an X in all applicable blanks):

- ___ The MSD eligibility criteria of THSC §361.803 are satisfied.
- ___ True and accurate copies of all documents demonstrating that the MSD eligibility criteria provided by THSC §361.803 have been satisfied and are included with the application.
- ___ A true and accurate copy of a legal description of the proposed MSD property is included with the application.
- ___ Notice was provided in accordance with THSC §361.805.
- ___ A copy of an ordinance or restrictive covenant and any required resolutions are provided in this application or will be provided before the executive director certifies this application.

Supporting Information Checklist

<input type="checkbox"/>	1. A map of the municipality in which the proposed MSD is located that demarcates all corporate limits, extraterritorial jurisdictions and the boundaries of the proposed MSD.
<input type="checkbox"/>	2. A map of the public water distribution system that demonstrates that a public drinking water supply system exists that supplies or is capable of supplying drinking water to the proposed MSD property and all property within 0.5 miles beyond the boundary of the proposed MSD, OR a statement from the appropriate authority for the public water system(s) that they supply drinking water or are capable of supplying drinking water to the proposed MSD property and all property within 0.5 miles beyond the boundary of the proposed MSD. If a map is provided, demarcate the proposed MSD and the area within 0.5 miles beyond the boundary of the proposed MSD and identify the key potable water mains and potable water service lines on the map.
<input type="checkbox"/>	3. A legal description of the MSD property (see special note in the instructions). Provide sufficient global positioning satellite coordinate locations to allow the MSD property boundaries to be plotted (map view) in a geographic information system.
<input type="checkbox"/>	4. A specific description of the designated groundwater that will be restricted under the ordinance or restrictive covenant. Describe the specific upper and lower bounding intervals in feet below ground surface of the designated groundwater zone(s), and provide any designated geological formation/unit/member names.
<input type="checkbox"/>	5. Documentation of the type of known groundwater contamination in the designated groundwater. Provide a table with the name and Chemical Abstract System Number for each known contaminant with a concentration in excess of a potable water use standard, the maximum contaminant concentration in mg/L units, and the associated potable water use standard in mg/L units. If this groundwater contamination information is being newly disclosed to the TCEQ via this application, provide a copy of the laboratory report(s), chain-of-custody documentation, a map of the location(s) where the samples were collected that document contamination, a copy of the Water Well Drillers Report, and monitoring well log(s) and completion data.
<input type="checkbox"/>	6. A copy of the draft or adopted ordinance or restrictive covenant and any required resolutions, unless choosing to defer providing such information until prior to agency certification of the application.
<input type="checkbox"/>	7. A map of the proposed MSD and the area five miles beyond each proposed MSD boundary with plotted: <ul style="list-style-type: none"> • boundaries of the proposed MSD; • boundaries of the corporate limit and extraterritorial jurisdiction for all municipalities coincident within an area extending 0.5 miles beyond the boundaries of the proposed MSD (if any); • service boundaries for any retail public utility(ies) that are coincident with the five mile area (if any); and • locations of each private well registered with the commission within the five mile area. For each identified private well, include a unique well identification number on the map and provide a copy of the Water Well Report.
<input type="checkbox"/>	8. A description of the actions taken and sources referenced to: <ul style="list-style-type: none"> • locate all private wells registered with the commission that are within five miles of the proposed MSD boundary, and • to determine the current owner and contact information for each identified well.
<input type="checkbox"/>	9. A table keyed to the unique well identification number in item 7 above, with the name of the corresponding well owner, the corresponding State of Texas Well Identification Number (if different), and a "yes" or "no" statement of whether notice to the well owner was successfully completed. At a minimum, check the local school and county tax district records for current property ownership in the event notice letters are returned undeliverable. For any private well located within 0.5 miles of the MSD property, hand deliver the notice to the property if other methods of delivery are unsuccessful and report the date the notice was delivered and the name and contact information for the person who delivered the notice as part of this supporting information.
<input type="checkbox"/>	10. A copy of each notice letter with the corresponding signed delivery receipt. To save paper, if the applicant provides a notarized statement that each letter was the same except for the addressee contact information, then one sample letter may be provided in lieu of providing a copy of each letter.
<input type="checkbox"/>	11. A paper copy and electronic listing of the contact names and mailing addresses for all persons required to be provided notice under THSC §361.805. The electronic list may be provided on a CD, diskette, or via e-mail in Microsoft Word® or Excel® and formatted as a data source for mail merge to generate the notice letters required under THSC §361.807(a). For those well owners where notification was never successfully completed, provide the contact information for the current owner of the property as listed in the tax district records.
<input type="checkbox"/>	12. An explanation of how the applicant knows whether the municipalities and/or the retail public utilities entitled to receive notice firmly support the proposed MSD. Provide the name, address, telephone number, and e-mail of the contact person within each entity that must support the MSD application via ordinance or resolution. If there is not support from every required entity, do not submit an application.

**Texas Commission on Environmental Quality
Payment Submittal Form**

Use this form to submit your \$1,000 MSD Application Fee. Submit this form and fee in the form of a check, certified check, electronic funds transfer, or money order payable to the Texas Commission on Environmental Quality **separately** from the completed MSD application. The fee is **non-refundable**. Do not submit the MSD application without submitting the application fee in advance of or at the same time the MSD application is submitted.

Please complete the following information, staple your check in the space provided at the bottom of this document, attach a copy of the first page of the MSD application form (only the page with the applicant and fee payment information), and mail it to:
